Monitoring Ratings
for Ten CAVIT Programs

Golden Bell Achievement Award through
Arizona School Boards Association

MISSION STATEMENT

The Central Arizona Valley Institute of Technology provides Career and Technology Education opportunities for students to become members of a competitive workforce.

VISION

Education with a Purpose

THE SCHOOL

Established in 2001, Central Arizona Valley Institute of Technology (CAVIT) is a career technology education district offering career and technical training to 11-12th grade students, as well as, graduates up to the age of 21. Offering instruction on a central campus located in Coolidge, CAVIT serves the career and college needs of 750 students that represent 17 area high schools. The student body represents culturally and economically diverse backgrounds. The school carries A+ School of Excellence designation and accreditation through Cognia.

The integrated academic and project-based technical curriculum prepares students for immediate employment and/or entrance into post-secondary education after high school graduation. Six of eight programs provide advanced students with free dual enrollment Career and Technical Education (CTE) dual enrollment college credit ranging from 3 to 9 credits through Central Arizona College (CAC). Qualified students participate in business and industry internships along with simulated work-based learning experiences. A total of 392 students earned CAC CTE dual enrollment college credit in FY24.

Through an application process, students are selected for enrollment based on their academic records, citizenship, and attendance. Students attend their home school for four periods a day and attend CAVIT for a one period, two-hour class. Program coursework is progressive in nature and follows an inquiry-based model that promotes critical thinking. Teachers are highly qualified in their content area with all staff carrying advanced degrees and industry certifications.

In addition to coursework and practical experience, the staff foster an environment of teamwork. Students are encouraged to participate in a wide variety of campus activities which include, but are not limited to, National Technical Honor Society, SkillsUSA, and HOSA. Students in the allied health, hairstyling, dental science, massage therapy, medical science, pharmacy science, and veterinary science programs operate campus clinics that provide wellness services to community residents two times per month. A FY24 total of 830 client surveys collected reveal a 99% evaluation average on the four student professional attribute question prompts.

A comprehensive career and college ready calendar of professional development activity is offered to all students. Partners from industry and post-secondary institutions collaborate with staff in delivering CAVIT's COLLEGECon, CONSUMERCon, and CAVITCon, Reverse Job Fair, Industry Tours, Career Display and Career Speaker Forum events. Service learning is embedded into the curriculum with each teacher conducting a community service project with students that is delivered to various groups within the county.
